

The **SFI Research Centre Transition Year Programme** brings together the expertise of 8 of Ireland's leading research centers funded by Science Foundation Ireland. This week includes an action packed schedule of workshops, lectures and demonstrations to students from around the country. Students have the opportunity to meet with professionals working and studying in a range of STEM disciplines and careers. During the week students are given the opportunity to engage with a range of STEM topics, gaining practical hands-on experience as well as becoming familiar with the language of critical thinking.

**The programme will be taking place this year from Tuesday 20th - Friday 23rd March 2018.**

For further information about applying contact Eimear Ferguson at [e.ferguson@ucc.ie](mailto:e.ferguson@ucc.ie) or alternatively visit any of the collaborating centers websites for further information.
